

Frequently Asked Questions About NatureSolv™

What Is NatureSolv™?

NatureSolv™ is a carbonless capsule technology that was developed by the research scientists and engineers in Glatfelter's Chillicothe, Ohio facility. It is a technology that utilizes naturally based, organic solvents to create a carbonless capsule that is more environmentally responsible—and is available **on every Glatfelter carbonless brand**. We guarantee it with our NatureSolv™ 100% Chain-of-Custody Guarantee.

What Is the NatureSolv 100% Chain-of-Custody Guarantee?

Glatfelter moved all of our carbonless products to this environmentally responsible capsule system in 2001. That means we can 100% guarantee that **every** form, **every** sheet, **every** roll of carbonless paper you receive that has a capsule will be the NatureSolv™ capsule. This is unique in the carbonless forms industry. This capsule system not only enables us to be a steward of our natural resources, but it also provides excellent image development, retaining the deep, black image that customers expect in their carbonless forms. So you sacrifice nothing of your carbonless quality expectations but gain a positive impact on the environment.

Triple chain of custody:

Is this going to cost me more money?

No! Many green technologies that have gained popularity in recent months actually cost the customer more money, sometimes a substantial sum. The great news about NatureSolv™ is that **it's already in all Glatfelter carbonless products**, at no additional cost to you, or your customers. Glatfelter provides a greener solution for you at our cost.

What else is Glatfelter doing for environmental stewardship?

Adding to our commitment to NatureSolv™, Glatfelter maintains triple chain-of-custody certification under the industry's most rigorous forestry standards: FSC®, SFI®, and PEFC®.

Where do I find NatureSolv, or get more information?

Only companies in the Glatfelter supply chain may provide carbonless paper with the NatureSolv™ 100% Guarantee. Our partners are the best names in the industry—forms manufacturers, printers, and paper merchants all committed to our message of environmental responsibility and exceptional product quality. You may locate these companies via our website.

HOW NatureSolv™ CAME TO BE

In 2001, we began offering the environmentally responsible, organically-based NatureSolv™ carbonless capsule, developed using renewable resources. We embraced environmental responsibility long before it was the popular trend, and it continues to be a core value of Glatfelter Carbonless Papers today. If environmental responsibility is important to your customers when ordering carbonless forms, NatureSolv™ by Glatfelter Carbonless Papers is your only choice.
